

Jim did an amazing job creating and designing our family website. We used it to celebrate our combination Anniversary/Birthday party. He edited all our family pictures spanning generations so that they were clear and engaging. He designed a message board so everyone who attended and didn't attend the party could leave us messages. Jim created an original and creative website that we will have for generations to come.

Jim did a great job creating and designing our wedding website. My fiancé and I were clueless on what to include, so he helped us come up with ideas. He went out of his way to make it complete and personal. He included photos, links to our registries, and an RSVP section. What I appreciated most was working with him. He was incredibly responsive with edits and additions, which was a nice stress relief as a bride! Jim obviously took a lot of time and care in designing what was a central part of our wedding coordination.
